

**CLAIM AMENDMENTS**

1. (CANCELLED)
2. (PREVIOUSLY ADDED) A security apparatus comprising:
  - a section of material having two sides and a plurality of edges, including a top edge and a bottom edge;
  - an access means;
  - a plurality of coupling members that are each connected to said material; and
  - a plurality of attachment members selectively connected to said plurality of coupling members and selectively attached to a vertical or horizontal support structure;wherein each of said plurality of attachment members is constructed for attachment to said vertical or horizontal support structure in a manner to permit fastening and unfastening of said attachment members from only one side of said material when attachment members are attached to said support structure and said section of material by said coupling members.
3. (CURRENTLY AMENDED) The security apparatus of claim 2, wherein said section of material comprises tear-resistant material that is cutproof.
4. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein said section of material comprises Kevlar.
5. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein said section of material is opaque.
6. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein said access means comprises an opening in said section of material.
7. (PREVIOUSLY ADDED) The security apparatus of claim 6, further comprising a zipper wherein said opening is opened and closed with said zipper.
8. (PREVIOUSLY ADDED) The security apparatus of claim 7, wherein said zipper is extended so as to allow an individual to freely exit and enter when said zipper is open.

9. (PREVIOUSLY ADDED) The security apparatus of claim 6, wherein said opening is selectively secured with a lock.

10. (PREVIOUSLY ADDED) The security apparatus of claim 2, further comprising a belt that tightens and reduces slack in said section of material.

11. (PREVIOUSLY ADDED) The security apparatus of claim 10, wherein said belt is positioned at or near the bottom edge of said section of material.

12. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein at least one of said coupling members is disposed at or near one of said edges of said section of material.

13. (CURRENTLY AMENDED) The security apparatus of claim 44 12, wherein at least one of said coupling members comprises a strap.

14. (CURRENTLY AMENDED) The security apparatus of claim 45 13, wherein at least one of said coupling members further comprises a ring.

15. (CURRENTLY AMENDED) The security apparatus of claim 44 12, wherein said coupling members comprises a grommet.

16. (CURRENTLY AMENDED) The security apparatus of claim 44 12, wherein said coupling members comprises a rivet.

17. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein said attachment members comprise hooks.

18. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein said attachment members comprise hangers.

19. (PREVIOUSLY ADDED) The security apparatus of claim 2, wherein said attachment members comprise fasteners.

20. (CURRENTLY AMENDED) A security system for protecting and safeguarding contents of a booth having an interior comprising:

a section of material having a plurality of side edges; and

a means for selectively securing two or more of said edges to a support frame;

wherein said means for selectively securing includes a plurality of attachment

members that ~~can be disengaged only from~~ are capable of disengagement from only the interior of said booth when two or more of said edges of said section of material are secured to said frame by said attachment members from the interior of the booth; and

wherein contents of said booth are substantially hidden when viewing said booth from a front of said booth at a distance during an operation of said security system.

21. (CURRENTLY AMENDED) The system of claim 24 20, wherein said section of material is opaque.

22. (PREVIOUSLY ADDED) The system of claim 21, wherein said section of material is comprised of Kevlar.

23. (PREVIOUSLY ADDED) The system of claim 21, wherein said means for selectively securing further comprises an article that forms an opening and is attached to said section of material.

24. (PREVIOUSLY ADDED) The system of claim 23, wherein said article is a loop.

25. (PREVIOUSLY ADDED) The system of claim 23, wherein said article is a strap.

26. (PREVIOUSLY ADDED) The system of claim 25, wherein said means for selectively securing further comprises a ring attached to said strap.

27. (PREVIOUSLY ADDED) The system of claim 23, wherein said article is a grommet.

28. (PREVIOUSLY ADDED) The system of claim 21, wherein said means for securing is fixed to said section of material.

29. (PREVIOUSLY ADDED) A security apparatus for guarding an interior area enclosed by three or more sides comprising:

a section of material;

a plurality of pairing members;

a plurality of fastening members for fastening said material to a support structure by said pairing members; and

a means for entrance and exit;

wherein said pairing members are connected to said material; and

wherein each of said plurality of fastening members are constructed for attachment to said structure in a manner to permit fastening and unfastening from only one side of said material when fastening members are attached to said structure with the section of material.

30. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein said structure is a beam.

31. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein said structure is an extruded pole.

32. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein one or more of said fastening members comprise a tightening member.

33. (PREVIOUSLY ADDED) The apparatus of claim 32, wherein said tightening member is configured for opening by hand without the use of a tool.

34. (PREVIOUSLY ADDED) The apparatus of claim 33, wherein said tightening member comprises a finger hold for loosening and tightening said tightening member.

35. (PREVIOUSLY ADDED) The apparatus of claim 34, wherein said finger hold is circular.

36. (PREVIOUSLY ADDED) The apparatus of claim 32, wherein said tightening member is configured for opening by use of a tool.

37. (PREVIOUSLY ADDED) The apparatus of claim 36, wherein said tool is a drill.

38. (PREVIOUSLY ADDED) The apparatus of claim 36, wherein said tool is an Allen wrench.

39. (PREVIOUSLY ADDED) The apparatus of claim 32, wherein one or more of said fastening members comprise a handle portion for holding said fastening members while attaching said fastening members to said structure.

40. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein one or more of said fastening members comprise a hooked portion for grasping an edge of said structure

41. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein one or more of said fastening members comprise a tightening member that works in conjunction with a hooked portion to hold an edge of said support structure

42. (PREVIOUSLY ADDED) The apparatus of claim 29, further comprising a plurality of hanging members at a border of said section of material.

43. (PREVIOUSLY ADDED) The apparatus of claim 42, wherein said hanging members are selectively attachable from said border of said section of material.

44. (PREVIOUSLY ADDED) The apparatus of claim 42, wherein said hanging members comprise a hanging portion configured for hanging from a cross bar.

45. (PREVIOUSLY ADDED) The apparatus of claim 42, wherein said hanging members comprise a projection having an end, said end adapted for removable connection to a lifting device.

46. (PREVIOUSLY ADDED) The apparatus of claim 45, wherein said lifting device comprises a pole.

47. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein each of said pairing members comprise a grommet.

48. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein each of said pairing members comprise a ring.

49. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein each of said pairing members comprise a strap.

50. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein each of said pairing members comprise a rivet.

51. (CURRENTLY AMENDED) The apparatus of claim ~~50~~ 49, wherein said strap forms a loop.

52. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein said entrance and exit means comprises a zipper disposed in said material.

53. (PREVIOUSLY ADDED) The apparatus of claim 29, wherein said entrance and exit means is securable by a belt.

54. (PREVIOUSLY ADDED) The apparatus of claim 53, wherein said entrance and exit means is further securable by a lock.
